1. Introduction

This section describes how MaineCare specific 837 Health Care Claim: Dental (837D) transaction set information will be detailed with the use of a table. The tables contain a row for each segment that MaineCare has something additional, over and above, the information in the Technical Report Type 3 (TR3). That information can:

- Limit the repeat of loops, or segments.
- Limit the length of a simple data element.
- Specify a sub-set of the Implementation Guides internal code listings.
- Clarify the use of loops, segments, composite and simple data elements.
- Any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with MaineCare.

In addition to the row for each segment, one or more additional rows are used to describe MaineCare's usage for composite and simple data elements and for any other information.

Table 1: 837D Transaction Set Descriptions specifies the columns and suggested use of the rows for the detailed description of the transaction set Companion Guides.

Table 1: 837D Transaction Set Descriptions

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
69	1000A	NM1	Submitter Name			This type of row always exists to indicate that a new segment has begun. It is always shaded and notes or comments about the segment itself go in this cell.
70	1000A	NM109	Identification Code		2/80	This type of row exists to limit the length of the specified data element.
129	2010BB	REF01	Reference Identification Qualifier	G2		This is the only code transmitted by MaineCare.
147	2300	CLM05-2	Facility Code Qualifier	B		This row illustrates how to indicate a component data element in the Reference column and also how to specify that only one code value is applicable.

1.1 Scope

2.3 Certification and Testing Overview

All Trading Partners will be authorized to submit production EDI transactions. Any Trading Partner may submit test EDI transactions. The Usage Indicator, element 15 of the Interchange Control Header (ISA) of any X12 file, indicates if a file is test or production. Authorization is granted on a per transaction basis. For example, a Trading Partner may be certified to submit 837P professional claims, but not certified to submit 837I institutional claim files.

Trading Partners will submit three test files of a particular transaction type, with a minimum of fifteen transactions within each file, and have no failures or rejections to become certified for production. Users will be notified (E-mail) of the Trading Partner Status page of Health PAS Online Portal (online portal) when testing for a particular transaction has been completed.

3. Testing with the Payer

Trading Partners must submit three test batches, and successfully pass the HIPAA validation, for each transaction type (837I, 837P, 837D, 270, 276, 278) they plan to submit into the Maine Integrated Health Management Solution (MIHMS).

To test an EDI transaction type, follow these steps:

- Log into the secure online portal using the user name and password that was created when you signed your Trading Partner Agreement.
- Select **File Exchange**.
- Under File Exchange, select **X12 Upload**.
- Select a file to upload by clicking the **Browse** button. Your computer will search for the X12 file you want to test.

- Once you have found the correct file, click the **Upload** button.
- You will receive a notice on your screen that says whether your upload was a <success> or <failed>. If failed, contact the EDI Help Desk for assistance.
- The report file may be found under File Exchange > Responses and Reports. Select **Responses** to view your report.
- Select the type of report you are searching for (e.g. 837) and a list of your recent 837 submissions will display. Scroll through the list to locate the correct file. Clicking **Search** will look for any new reports that have been generated.

4. Connectivity with the Payer/Communications

This section contains process flow diagrams relating to the four different exchange methods with MaineCare.

4.1 Process Flows

Eligibility Inquiries (270/271) and Claim Status Inquiry Response X12N files (276/277) can be exchanged with the Maine MMIS four different ways through CAQH defined Web Service interface File Transfer Protocol (FTP) transmission over Virtual Private Network (VPN) dedicated connection to Molina datacenters for Value Added Network (VAN) Trading Partners; or through a dedicated Transmission Control Protocol/Internet Protocol (TCP/IP) communication channel in a real-time, request/response, manner for MEVS Trading Partners.

- **Real-Time Web Services:** Trading Partners who wish to exchange Eligibility Benefit Inquiries and Claim Status and Responses with the Maine MMIS using CAQH-defined Web Services can do so using HTTPS over the Internet.

***NOTE:** 837D transactions are not available through Real-Time Web Services.*

- **Health PAS Online:** Trading Partners who wish to exchange Health Care Claim: Dental (837D) transactions with the Maine Medicaid Management Information System (MMIS) using Health PAS Online can do so by navigating to the File Exchange area and choosing **X12 Upload**. Acknowledgements and Responses to transactions submitted via Health PAS Online, or the 835, can be accessed by selecting **Download/Responses** under the File Exchange menu.
- **VAN:** Clearinghouses that are registered as VANs can submit Claim 837D transactions via Secured FTP and may retrieve acknowledgements and responses, and the 835, from their designated secured FTP pickup location.
- **MEVS:** Trading Partners who are registered as MEVS vendors can submit Eligibility Inquiry transactions through a dedicated TCP/IP communication channel in a real-time, request/response, manner using TCP/IP socket communications and will receive their responses in real-time, request/response fashion.

***NOTE:** Eligibility and Claim Status transactions are the only real-time requests for MEVS.*

4.2 Transmission Administrative Procedures

All transactions sent for processing are required to be in compliance with the ASC X12N version 5010 Technical Report Type 3s standards. Non-compliant transactions will be rejected during the HIPAA validation process.

MaineCare does not require the use of specific values for the delimiters used in electronic transactions.

The following constraints apply to all 837 file transmissions to MaineCare:

- Only one Interchange per transmission
- Only one Functional Group (GS/GE) per interchange
- Single transmission file size must be less than 4MB
- Maximum of 5,000 claims per transmission

4.3 Re-Transmission Procedure

All transactions sent for processing are required to be in compliance with the ASC X12N version 5010 Technical Report Type 3s standards. Non-compliant transactions will be rejected during the HIPAA validation process.

MaineCare does not require the use of specific values for the delimiters used in electronic transactions.

The following constraints apply to all 837 file transmissions to MaineCare:

- Only one Interchange per transmission
- Only one Functional Group (GS/GE) per interchange
- Single transmission file size must be less than 4MB
- Maximum of 5,000 claims per transmission

4.4 Communication Protocol/Specifications

This section describes MaineCare's communication protocol. The information exchanged between devices, through a network or other media, is governed by rules and conventions that can be set out in a technical specification called communication protocol standards. The nature of the communication, the actual data exchanged and any state-dependent behaviors, is defined by its specification.

4.5 Passwords

Trading Partners will create a user name and password during the Trading Partner Account registration process. Passwords must adhere to following criteria:

- Must be at least six characters long.
- Must contain at least one each of:
 - Upper case letter
 - Lower case letter
 - Special character
 - A number
- Passwords may not contain spaces.

For additional security, you are required to change the password of your Trading Partner user name every sixty (60) days. You will retain your user name, but the password must be changed. If you do not remember to change your password after sixty (60) days, you will be prompted to reset the password when you attempt to log in.

If you forget or lose the current password for your Trading Partner user name, you can reset it from the online portal home page by following these steps:

- Select the **Reset Password link**.
- The online portal displays the Forgot Your Password screen. Specify your Trading Partner user name in the box and click the **Continue** button.
- The online portal displays the email address and security question associated with this user name. Type the answer to the security question in the Security Answer box and click the **Continue** button. If you successfully answered the question, the online portal sends a confirmation email to the address associated with the user name that the password has been reset.
- The email contains a confirmation link and activation PIN. Click the link, or copy it and paste it into your browser. The online portal displays the Change Password screen with your user name and activation PIN already filled in for you. To complete the Change Password screen:
 - In the **New Password** field, type a password that follows the password criteria.
 - In the **Confirm New Password** fields, retype the password exactly as you typed it in the New Password field.
 - Click the **Change Password** button. The online portal displays a confirmation message.

8.1 Report Inventory

This section contains an inventory of all applicable acknowledgement reports. Inventory is defined as a list of all applicable acknowledgement reports (e.g. TA1 Interchange Acknowledgement).

- TA1 interchange Acknowledgement:** is used to verify the syntactical accuracy of the envelope of the X12 interchange. The TA1 interchange will indicate that the file was successfully received; as well as indicate what errors existed within the envelope segments of the received X12 file.

The structure of a TA1 interchange acknowledgement depends on the structure of the envelope of the original EDI document. When the envelope of the EDI document does not contain an error then the interchange acknowledgement will contain the ISA, TA1, and IEA segments. The TA1 segment will have an Interchange Acknowledgement Code of 'A' (Accepted) followed by a three digit code of '000' which indicates that there were not any errors.

If the EDI document contains an error at the interchange level, such as in the Interchange Control Header (ISA) segment or the Interchange control trailer (IEA), then the interchange acknowledgement will also only contain the ISA, TA1, and IEA segments. The TA1 segment will have an Interchange Acknowledgement Code of 'R' (Rejected) which will be followed by a three-digit number that corresponds to one of the following codes shown in Table 2: Interchange Acknowledgement Codes.

Table 2: Interchange Acknowledgement Codes

Code	Description
000	No error
001	The Interchange Control Number in the Header and Trailer Do Not Match. The Value From the Header is Used in the Acknowledgment
002	This Standard as Noted in the Control Standards Identifier is Not Supported
003	This Version of the Controls is Not Supported
005	Invalid Interchange ID Qualifier for Sender
006	Invalid Interchange Sender ID
009	Unknown Interchange Receiver ID
010	Invalid Authorization Information Qualifier Value (ISA01 is not '00' or '03')
012	Invalid Security Information Qualifier Value
013	Invalid Security Information Value
018	Invalid Interchange Control Number Value
019	Invalid Acknowledgment Requested Value
020	Invalid Test Indicator Value
021	Invalid Number of Included Groups Value
023	Improper (Premature) End-of-File (Transmission)
024	Invalid Interchange Content (e.g., Invalid GS Segment)
025	Duplicate Interchange Control Number

- 999 Implementation Acknowledgement:** for Health Care Insurance the ASC X12 999 transaction set is designed to report only on conformance against a Technical Report Type 3 guideline (TR3). The 999 is not limited to only IG errors. It can report standard syntax errors, as well as IG errors. The 999 can NOT be used for any application level validations. The ASC X12 999 transaction set is designed to respond to one and only one functional group (e.g. GS/GE), but will respond to all transaction sets (e.g. ST/SE) within that functional group. This ASC X12 999 Implementation Acknowledgement can NOT be used to respond to any management transaction sets intended for acknowledgements, e.g. TS 997 and 999, or interchange control segments related to acknowledgments, e.g. TA1 and TA3. Each segment in a 999 functional acknowledgement plays a specific role in the transaction. For example, the AK1 segment starts the acknowledgement of a functional group. Each AKx segment has a separate set of associated error codes. The 999 functional acknowledgement includes but is not limited to, the following required segments:

- ST segment—Transaction Set Header
- AK1 - Functional Group Response Header
- AK2 - Transaction Set Response Header
- IK3 – Error Identification
- CTX – Segment Context
- CTX – Business Unit Identifier
- IK4 – Implementation Data Element Note
- CXT – Element Context
- IK5 – Transaction set response trailer
- AK9 - Functional Group Response Trailer
- SE -Transaction Set Trailer

For additional information regarding the 999 transaction, reference the Technical Report Type 3 Acknowledgement Section of the ASC X12 Standards for Electronic Data Interchange Technical Report Type 3 Implementation Guideline for the transaction you are submitting.

- **824 Application Advice:** This transaction is not mandated by HIPAA, but will be used to report the results of data content edits of transaction sets. It is designed to report rejections based on business rules such as; invalid diagnosis codes, invalid procedure codes, and invalid provider numbers. The 824 Application Advice does not replace the 999 or TA1 transactions and will only be generated by Health PAS if there are errors within the transaction set.

The 824 acknowledgment is divided into two levels of segments; header and detail.

- The header level contains general information, such as the transaction set control reference number of the previously sent transaction, date, time, submitter, and receiver.
- The detail level reports the results of an application system's data content edits.

The 824 Application Advice includes but is not limited to following segments and their roles:

- Header Segments:
 - ST segment—Transaction Set Header
 - BGN segment—Beginning Segment
 - N1 segment—Submitter Name
 - N1 segment—Receiver Name
- Detail Segments:
 - OTI segment—Original Transaction Identification
 - TED segment—Error or Informational Message Location
 - RED segment—Error or Informational Message
 - SE segment—Transaction Set Trailer

The Health PAS Application output the following errors in the TED segment of the 824 Application Advice, as shown in Table 3: TED Segment Error Codes.

9. Trading Partner Agreements

A Trading Partner Agreement (TPA) is a legal contract between Molina, acting on behalf of the State of Maine, Department of Health and Human Services and a provider/billing agent/clearinghouse/health plan to exchange electronic information.

The desire to exchange by and through electronic communications, certain claims and billing information that may contain identifiable financial and/or protected health information (PHI) as defined under the Health Insurance Portability and Accountability Act of 1996 (HIPAA), 45 Code of Federal Regulations Parts 160-164, and applicable regulations that implement Title V of the Gramm-Leach-Bliley Act, 15 U.S.C. § 6801, et seq. The parties agree to safeguard any and all PHI or other data received, transmitted or accessed electronically to or from each other in accordance with HIPAA. This agreement is within the TPA.

9.1 Trading Partners

- Provider
- Billing Agency
- Clearinghouse

- Internal User
- Health Plan

Molina will assign Trading Partner IDs to support the exchange of X12 EDI transactions for providers, billing agencies and clearinghouses, and other health plans.

10. Transaction Specific Information

This section describes the MaineCare specific 837D transaction set information requirements, which are outlined in Table 4: 837 Dental Claim. The table contains a row for each segment that MaineCare has something additional, over and above, the information in the Technical Report Type 3 (TR3). That information can:

- Limit the repeat of loops, or segments.
- Limit the length of a simple data element.
- Specify a sub-set of the Implementation Guides internal code listings.
- Clarify the use of loops, segments, composite and simple data elements.
- Any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with MaineCare.
